Sustainable Energy Now (SEN) endorses the changes proposed in the Electricity Industry Amendment (Distributed Energy Resources) Bill 2023.

In particular, SEN supports:

- the inclusion of environmental matters (including emissions) in the State Electricity Objective
- the requirement for a review of the Wholesale Electricity Market (including public consultation) every three years
- provisions to enable more flexibility in a rapidly-changing electricity environment

SEN looks forward to providing input into the regulations and market rules that will be developed following the passage of the legislation.

Sincerely

Dr. Rob Phillips

Vice-Chair, Sustainable Energy Now Inc
